6.Our Product (Dropdown)

(i).specialty products and other product pages not found.

7. Scroll bar translation

(i) Not according to xd

***Is the website exactly like design?**

– Yes the site is almost exactly like the Xd although some part are missing which I have mentioned above.
– Also the mobile responsiveness of the design is very poor as compared to bigger screen.
  We need to work on mobile responsiveness mostly.

***What enhancements to be done on desktop screens from (1080px - 2500px) ?**

– As I reviewed, almost all the components are responsive on the bigger screen.
– We can target the bigger screen and make it responsive accordingly.

***Js enhancement -(ex. Form validations)?**

— Form validation is not working. Need to be enhanced for the data to be received in the correct format.
